<u>PRE-FABRICATED TRUSS DESIGN REVIEW WAIVER</u>					
This certificate must be used in lieu of city review of prefabricated truss designs for a building, if designed by a registered structural engineer, licensed in the State of Arizona.					
As the AZ registered Structural Engineer in charge of the structural design of this building, I will review the approved fabricator's truss designs and ALL related connections (including all revisions to the truss design) provided to me for compatibility with the above referenced project. I shall affix my shop drawing stamp or other means of identification, hand signed and dated to either the truss manufacturer's layout sheet, or to a letter of approval with an index of truss calculation sheets in said letter.					
Name of Structural Engineer (please print)			(Seal Required)		
As the Owner/Applicant/Authorized Agent, I agree that all truss design information will be provided to the AZ registered Structural Engineer, in charge of the structural design of the building, for their review and approval, including all revisions. All documents shall be provided to the structural engineer in ample time for a proper review and approval and to permit the approved truss design packet to be available to the City inspector, prior to trusses being set in place.					
Name & Title (please print)			Signature & Date		
Truss design calculation sheets shall be legible, sealed, hand signed and dated by the AZ Truss design engineer. The truss fabricator shall have a current third party quarterly inspection report performed by an approved inspection agency. A complete set of the truss design calculation sheets, truss placement sheets and proof of building design engineer's review & approval shall be included with the city-stamped "Job Site Approved" set of plans prior to the trusses being set in place.					
FOR OFFICE USE ONLY: Rev. 12/03
